Financial assistance programs including copay support, at little to no cost.*

A 1-month supply of ANDEMBRY will be shipped to you at no cost.†

Provides you with the opportunity to learn from someone who has experience with HAE.

WHAT IS ANDEMBRY

ANDEMBRY is an activated Factor XII (FXIIa) inhibitor prescription medication used to prevent attacks of hereditary angioedema (HAE) in people 12 years and older.

The treatment begins with an initial loading dose of 400 mg (two injections of 200 mg) administered subcutaneously on the first day of treatment, followed by maintenance dose of 200 mg once monthly.

* Subject to terms and conditions of the copay assistance program. To read the full terms and conditions, visit csلبهرing.com/patients/support-and-assistance. CSL Behring reserves the right to rescind, revoke, or amend the program at any time without notice.

† Eligible patients can continue the program and receive up to 2 months of ANDEMBRY at no cost. Continued supply of ANDEMBRY may be extended during the insurance approval process. Participation in the QuickStart program does not result in any future purchase obligation. Patients may not seek insurance reimbursement for product provided through the QuickStart program. QuickStart product may not be counted towards a patient's true out of pocket cost for any Part D enrollee.

‡ Void where prohibited by law, taxed, or restricted. The program is not transferable. No substitutions permitted. CSL Behring reserves the right to rescind, revoke, or amend the QuickStart Program for ANDEMBRY at any time without notice.

IMPORTANT SAFETY INFORMATION (Cont'd)

What should I tell my healthcare provider before using ANDEMBRY?

Before using ANDEMBRY, tell your healthcare provider about any medical condition you may have, especially if you are pregnant, planning to become pregnant, breastfeeding, or planning to breastfeed. It is not known if ANDEMBRY can harm your unborn baby or if ANDEMBRY passes into breastmilk. Talk to your healthcare provider about the best way to feed your baby while using ANDEMBRY.

Tell your healthcare provider about all medications you take, including prescription medicines, over-the-counter treatments, vitamins, and herbal supplements.

How should I use ANDEMBRY?

Use ANDEMBRY exactly as instructed by your healthcare provider. Detailed instructions for use can be found in the patient information section of the full prescribing information.

ANDEMBRY is given as an injection under your skin (subcutaneous) by you or a caregiver. Your healthcare provider should show you or your caregiver how

to prepare and inject your dose of ANDEMBRY before you inject yourself for the first time. **Do not** try to inject ANDEMBRY unless you have been trained by your healthcare provider.

What are the possible side effects of ANDEMBRY?

The most common side effects of ANDEMBRY include:

- Redness, itchiness, and bruising (injection-site reactions)
- Stomach (abdominal) pain
- Runny or stuffy nose, sneezing, watery eyes (nasopharyngitis)

Please see full prescribing information for ANDEMBRY, including patient information and instructions for use.

You are encouraged to report negative side effects of prescription drugs to the FDA.

Visit www.fda.gov/medwatch, or call 1-800-FDA-1088.

You can also report side effects to CSL Behring's Pharmacovigilance Department at 1-866-915-6958.
